

Winnie Industries

MANUFACTURER OF FASTENING SUPPORTS

Bridle Ring

Bridle Ring with Powder Actuated Pin

Fast and cost-effective alternative cable management solution for voice, data, low voltage or video cabling pathway applications

Features:

- Crafted from heavy-duty, zinc plated steel which allows for great durability & corrosion resistance
- Available in 1.25", 2" & 4" ring diameter *preassembled* on 90° angle clip & .300 x 1-1/4" powder actuated pin
- Designed with open loop for quick & easy cable installation
- Cost effective alternative to expensive cable tray
- Provides support for CAT5e/CAT6 category cable, low-voltage wire, coax, signal & control cable and electrical wire up to 600V
- Suitable for use in air handling systems (plenums) in accordance with Section 300.22 (C) and (D) of the National Electric Code
- Compatible with Ramset, Hilti, and Powers nail guns

Application:

- Provides support in the distribution of wire & cable bundles
 - Network/Data
 - Telecom/Voice
 - Broadband, Satellite, CCTV
 - Low Voltage/Security/Fire Alarm
 - Signal/Control Cable
 - Electrical Wire

Installation:

- Secures bridle ring to concrete, masonry, steel or composite metal decking using powder actuated or single-shot gas gun
- Use for horizontal or vertical cable runs

Bridle Ring

Part Numbers

Part #	Description	Box Qty	UPC
WBR125ACT	1-1/4" Bridle Ring, 1/4-20 Thread, 90° Angle Clip, Powder Actuated Shot	100	811443030772
WBR200ACT	2" Bridle Ring, 1/4-20 Thread, 90° Angle Clip, Powder Actuated Shot	100	811443030789
WBR400ACT	4" Bridle Ring, 1/4-20 Thread, 90° Angle Clip, Powder Actuated Shot	100	811443031755

- | Fast and cost-effective way to support category, voice, security, fire alarm and video cable |
- | Fully assembled, ready to install straight from the box saving time and reducing cost |
- | Great low-cost alternative to j hook or cable tray |
- | Can be used horizontally or vertically, making them ideal for multi-directional cable runs |
- | If using a bridle ring with high performance data cable, a saddle is required to ensure proper bend |
- | Non-continuous supports may not exceed spacing of 5' per TIA 569-C.9.7 |
